## Frankfurt Ostend: The sun rises over the East End

The historical, industrial district Frankfurt Ostend has been transformed into a vibrant quarter. Here, creativity and dynamic vitality are at home, both inside and outside on the surrounding streets. Shaping the future is only possible within a creative environment: Progress needs to be lived. It is therefore not without pride that we call one of our meeting rooms „Sunrise“.

Diversity is a defining characteristic of the quarter, where offices have taken over former industrial buildings: The Ostend is becoming a modern hive of service-oriented business activity, with the Hanauer Landstraße as its main artery. And it is within these inspiring surroundings that we operate the world's leading Internet Exchange Point, called DE-CIX.

Today, making a difference means getting access to the world's information. You will hardly find faster internet connectivity anywhere else than we offer you in our MeetingCenter. We're right at the source and provide you with a 1 Gigabit WiFi network and a state-of-the-art video conferencing system to help you reach unimagined possibilities.

After sunset the urban Frankfurt Ostend reveals its second face: Trendy eateries and the hippest clubs in town beckon. With that in mind we aptly named our second meeting room "Sunset". Throughout the entire Ostend you can feel the winds of change, so we invite you to be inspired too.

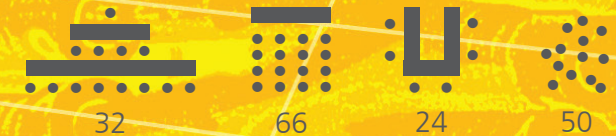

**The DE-CIX MeetingCenter: Feel the Change – In the Center of Creativity!**
